

Name : Vedant Malpure
Roll No. : TCOB24
Assignment No. : 12 (B2)
Subject : DSBD Lab

1. LogFileMapper.java (Used for mapping the IP addresses from the input CSV file)

```
package LogFileCountry;

import java.io.IOException;
import org.apache.hadoop.io.IntWritable;
import org.apache.hadoop.io.LongWritable;
import org.apache.hadoop.io.Text;
import org.apache.hadoop.mapred.*;

public class LogFileMapper extends MapReduceBase implements Mapper<LongWritable, Text, Text, IntWritable> {
    private final static IntWritable one = new IntWritable(1);

    public void map(LongWritable key, Text value, OutputCollector<Text, IntWritable> output, Reporter reporter)
        throws IOException {
        String valueString = value.toString();
        String[] SingleIpData = valueString.split("-");
        output.collect(new Text(SingleIpData[0]), one);
    }
}
```

2. LogFileReduce.java (Used for reducing the data received from the mapper process to the final output)

```
package LogFileCountry;

import java.io.IOException;
import java.util.*;
import org.apache.hadoop.io.IntWritable;
import org.apache.hadoop.io.Text;
import org.apache.hadoop.mapred.*;

public class LogFileReducer extends MapReduceBase implements Reducer<Text, IntWritable, Text, IntWritable> {
    public void reduce(Text t_key, Iterator<IntWritable> values, OutputCollector<Text, IntWritable> output,
        Reporter reporter) throws IOException {
        Text key = t_key;
        int frequencyForIp = 0;

        while (values.hasNext()) {
            // replace type of value with the actual type of our value
            IntWritable value = (IntWritable) values.next();
        }
    }
}
```

```

        frequencyForIp += value.get();
    }

    output.collect(key, new IntWritable(frequencyForIp));
}
}

```

3. LogFileCountryDriver.java (The driver code to run MapReduce on HDFS)

```

package LogFileCountry;

import org.apache.hadoop.fs.Path;
import org.apache.hadoop.io.*;
import org.apache.hadoop.mapred.*;

public class LogFileCountryDriver {
    public static void main(String[] args) {
        JobClient my_client = new JobClient();

        // Create a configuration object for the job
        JobConf job_conf = new JobConf(LogFileCountryDriver.class);

        // Set a name for the job
        job_conf.setJobName("LogFileIP");

        // Specify data type of output key and value
        job_conf.setOutputKeyClass(Text.class);
        job_conf.setOutputValueClass(IntWritable.class);

        // Specify names of Mapper and Reducer Class
        job_conf.setMapperClass(LogFileCountry.LogFileMapper.class);
        job_conf.setReducerClass(LogFileCountry.LogFileReducer.class);

        // Specify formats of the data type of Input and Output
        job_conf.setInputFormat(TextInputFormat.class);
        job_conf.setOutputFormat(TextOutputFormat.class);

        // Set input and output directories using command line arguments,
        // arg[0] = name of input directory on HDFS, and arg[1] = name of output directory to be created to store the
        // output file.
        FileInputFormat.setInputPaths(job_conf, new Path(args[0]));
        FileOutputFormat.setOutputPath(job_conf, new Path(args[1]));

        my_client.setConf(job_conf);

        try {
            // Run the job
            JobClient.runJob(job_conf);
        } catch (Exception e) {
            e.printStackTrace();
        }
    }
}

```

```
}  
}  
}
```

Log File Input Sample (log_file.txt):

```
0.223.157.186 - - [15/Jul/2009:20:50:32 -0700] "GET /assets/js/the-associates.js HTTP/1.1" 304 -  
10.223.157.186 - - [15/Jul/2009:20:50:33 -0700] "GET /assets/img/home-logo.png HTTP/1.1" 304 -  
10.223.157.186 - - [15/Jul/2009:20:50:33 -0700] "GET /assets/img/dummy/primary-news-2.jpg HTTP/1.1" 304 -  
10.223.157.186 - - [15/Jul/2009:20:50:33 -0700] "GET /assets/img/dummy/primary-news-1.jpg HTTP/1.1" 304 -  
10.223.157.186 - - [15/Jul/2009:20:50:33 -0700] "GET /assets/img/home-media-block-placeholder.jpg HTTP/1.1"
